Computer Science Colloquium

Date: Dec 3, 2014. 3:30 – 4:20 PM

Place: JEB 328

Speaker: Adam Phillabaum, Rival IQ

Who is Invited? Everyone!

Title: How to build a modern web application

Abstract

Adam will cover key ideas, technologies, and methodologies for building and maintaining web applications. Starting from `Hello World` and growing into millions of visitors a day.

Bio

Adam Phillabaum graduated from University of Idaho's Computer Science Department in 2004. He then went to work as a Database Administrator at Boeing, while earning his Master's degree from Carnegie Mellon University. Then he spent the next 7 years helping grow PayScale to a company servicing millions of people a month with thousands of businesses subscribing to their product. Adam is currently the Director of Engineering for the PayScale Platform group, where he leads the team responsible for security, storage, scale and smarts (machine learning).
